**Question II.A.5: Fiber Map**  
**Special Access Data Collection**  
**Randolph Telephone Membership Corp - 0001951284**

Question II.A.5: Fiber Network Map - Fiber Map. Competitive Providers, not including cable companies operating within their local franchise areas (LFAs), must provide a map of the fiber routes that constitute their network. Include those fiber “spans” (i.e., lengths of fiber with terminating equipment on both ends) within your network that you (i) own or (ii) lease pursuant an IRU agreement. The map must show the fiber routes that constitute your network, including the “middle-mile” transport fiber network and any fiber routes to Locations. For Competitive Providers that are cable companies operating within their LFAs, provide a map of the fiber routes constituting your “middle mile” interoffice transport network. Include those fiber “spans” (i.e., lengths of fiber with terminating equipment on both ends) within your network that you (i) own or (ii) lease pursuant an IRU agreement. The map need not show the “last mile” fiber routes to Locations, i.e., the feeder links.

Map redacted in entirety.

**Question II.A.5: Nodes**  
**Special Access Data Collection**  
**Randolph Telephone Membership Corp - 0001951284**

**Nodes.** Competitive Providers, not including cable companies operating within their LFAs, identify all Nodes on your network that are points of interconnection with the networks of other Providers and indicate the year that the Node was first used for interconnecting with another Provider. In lieu of identifying Nodes used for interconnection, you can submit to the Commission the interconnection data on file with the Central Location Online Entry System (CLONES) database for your operations. The certification submitted in connection with your submission will attest that the CLONES data are current and accurately depict your network interconnection points and the “live” dates to the best of your knowledge. For Competitive Providers that are cable companies operating within their LFAs, indicate only those Nodes that are headends that have been upgraded to provide a Metro Ethernet (or its equivalent) service and the year the upgrade was completed.

Node table redacted in its entirety.
